

You'll be surprised at the things kids pick up in their first weeks of school.

Day care and school environments are the ideal breeding ground for threadworms. Yet while they're easy for kids to pick up, threadworms are not so easy to detect. COMBANTRIN®-1 products are an easy way to help ensure your kids are threadworm free. Available in tasty chocolate squares, COMBANTRIN®-1 can effectively treat threadworms in a single square, so it's easy to administer to your child. For more information see your local pharmacy or call us toll-free on 1800 778 640.
